Pillar Induction Delivers 75kW Melting System for Gold & Silver Refining

Pillar Induction has commissioned a new 75kW medium frequency induction melting installation at a leading precious metal refiner in the Midwest United States.

The new installation consists of one medium frequency 150 lb. steel frame furnace with a hydraulic tilt system. The system is powered by a 75 kW, 3kHz Pillar MK8 power supply.

A closed pressurized water cooling system was provided to cool the power supply and three furnaces. The water cooling system included a single pump, pumping station.

Pillar provided the complete system with water cooled power leads, bus work and interconnection.

Pillar Induction is based in Brookfield, WI USA. More information can be found at www.pillar.com

###

Founded in 1966, Pillar Induction is committed to providing total induction solutions in the melting, tube & pipe, heating, forging, heat treating and crystal growing markets. Pillar is committed to helping its customers achieve leaner, more profitable manufacturing, and continues to add products and engineered solutions for an integrated approach to manufacturing efficiency. Pillar Induction is an ISO 9001:2008 certified company. For more information, please contact Pillar Induction at 21905 Gateway Road, Brookfield, WI 53045. Phone: 262-317-5300; Fax: 262-317-5394.
